Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[https://github.com/hariselvi1813-stack/LegalEase-AI-Powered-Documents-Generator / https://drive.google.com/file/d/1bjR29hVyshibdXit--pQAINqWaGXrjkg/view?usp=drivesdk]
Programming Language(s)	Python, JavaScript, HTML, CSS
Framework(s) Used	Flask (backend), Jinja2 (templating), Bootstrap (UI), SQLite/SQLAlchemy (database), LLM API for text generation
Key Features Implemented	1. Secure user registration and login 2. Template library (rental agreement, NDA, affidavit, employment contract, etc.) 3. Guided input form with validation 4. AI-powered legal document generation from user inputs 5. Plain-language clause explanation 6. Document preview and editing 7. PDF / DOCX export 8. Saved documents history dashboard
Pending / Incomplete Features	Multi-language (regional language) support Digital signature / e-sign integration Lawyer review and approval workflow
Setup / Run Instructions	1. Clone the repository and open the project folder. 2. Create a virtual environment: <code>python -m venv venv</code> and

	activate it. 3. Install dependencies: <code>pip install -r requirements.txt</code> 4. Create a <code>.env</code> file with the AI API key and <code>SECRET_KEY</code>. 5. Initialise the database: <code>flask db upgrade</code> 6. Run the app: <code>flask run</code>, then open <code>http://127.0.0.1:5000</code>

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

Problem Statement: LegalEase – AI-powered legal document generator that lets users create accurate, customised legal documents in minutes without prior legal knowledge.

Generated documents are drafts for assistance and should be reviewed by a qualified legal professional before use.
